UDOR 6010.97 Control Unit

Operating Instructions and Parts List

OPERATING INSTRUCTIONS

7132

The control unit features a manual dump valve, pressure control knob, glycerine filled pressure gauge, and two ball valve discharge ports.

1374

- 1. Before operating or re-operating the pump move lever (Ref. #7379) to the dump position (Right) so the pump will start at zero pressure. FAILURE TO DO SO WILL VOID THE PUMP WARRANTY.
- 2. Turn pressure adjustment knob (Ref. #2390) counter clockwise to relieve spring tension. This step only applies to the initial start up and is not necessary in daily operation of pump.
- 3. Start unit and let run until air is evacuated from the system.
- 4. Move lever (Ref. #7379) to the pressure position (Left) open spray gun or spray boom and turn the pressure adjustment knob (Ref. #2390) clockwise until desired operating pressure is achieved.

PROTECT PUMP FROM FREEZING.

If freezing conditions exist, flush pump with a 50/50 mixture of antifreeze and water.
